SKILLS

- Full stack Development, Web Performance
- Typescript, SCSS, Next.js
- Node.js Nest.js, Express, prisma and Jest
- PostgreSQL, MongoDB
- Project Management Tools
- Responsive web design
- Problem-Solving
- Embedded Systems

HOBBIES

Reading books
Playing an instrument
Travelling

PROFILE

I am a results-driven and technologically adept learner specializing in Mechatronics Technology. My expertise spans computer software development, as full-stack software developer, I showcase proficiency in a variety of programming languages, including Typescript, Javascript (Node.js and React). As a self-motivated learner, I possess a high level of adaptability to evolving technologies, complemented by strong collaborative and independent working skills. My tech-savvy nature is coupled with a fervent passion for blogging and continuous self-development.

EDUCATION

IPRC Kigali

2021 - 2024

A1 Diploma in Mechatronics Technology.

Andela Technical Leadership Program (ATLP)

Nov 2022 - Aug 2023

completion 9 months of foundation skills in software Engineering

ALX Software Engineering.

February 2022

Completion of full-stack development with technologies (React Js, Nodejs, typescript, Tailwind, jest, mocha, Redux, docker, swagger, figma design, github and Git)

WORK EXPERIENCE

Tekki Ltd , junior Technical team leader

Sept 2023 - currently

As a Junior Technical Team Leader, I spearhead backend development using Node.js, TypeScript, Nest.js, Docker, and Swagger. Responsibilities include enforcing coding standards and conducting code reviews. I lead the frontend team in Angular.js, focusing on responsive interfaces with material UI. Leveraging Jest to ensure robust testing practices. I promote seamless version control with Git and GitHub, fostering a positive team culture. Through effective coordination and communication, my goal is to ensure the successful delivery of high-performance, user-centric full-stack applications

Tekki Ltd, apprentice, Backend developer

May 2023 - July 2023

As a backend developer, I work with team to design and implement scalable server-side solutions using Node.js, TypeScript, and Nest.js. I ensure efficient deployment with Docker, maintain coding standards, conduct thorough code reviews and testing processes using Jest.

OTHER PROJECTS

- [e-commerce backend REST API](#) (nodejs, docker, typescript, jest, swagger, expressjs, sequelize-orm)
- [e-commerce frontend](#) (react, redux, typescript, webpack, reactjs, scss, storybook, tailwindcss)
- [wildlife conservation travel website](#) (Javascript, html, scss)
